In re app. of: Dehlsen, et al.

Application #: 10/644,419

Filing Date: 08/19/2004

Title: Self-Erecting Tower and Method for Raising
the Tower

Art Unit: 3635

Examiner: Canfield, Robert

AMENDMENT AFTER ALLOWANCE

(Issue Fee Paid)

Commissioner of Patents & Trademarks

Washington, DC 20231

Sir:

This amendment is in response to the Notice Regarding Drawings mailed 7/19/2005. Please replace the five sheets of drawings currently in the application with the enclosed five sheets of new drawings.

The notice itemized three reasons, items 10, 11 and 12, which have corrected as follows:

Item 10: In all of the figures the lines, numbers and letters have been made thicker. The reference characters are at least 1/8 inch in height (12 point type).

Item 11: In figures 2A-2H the gray-scale background has been changed to white with no border. Also the gray-scale shading on the tower and crane has been removed. The drawings have been made larger.

Item 12: In figures 1A and 1B (Prior art), the numbers denoting the length of the tower sections have been made horizontal and the reference numerals legible. Numbers denoting the length of the tower sections in figure 1A have been eliminated since this is shown in figure 1B.

All numbers, letters and reference characters are now at least 1/8 inch in height.

Respectfully submitted,

Date: August 22, 2005
